

A 3D rendering of a dark gray, circular, textured object, possibly a coin or a small disk, with a raised, rectangular feature in the center. The object is shown from a slightly elevated, angled perspective, highlighting its circular shape and the central protrusion. The surface has a fine, grainy texture, and the lighting creates soft shadows, emphasizing its three-dimensional form.

A diagram of a circular disk with a central hole. The outer diameter is labeled as 52. The central hole is a smaller circle with three horizontal lines inside it, indicating it is a through-hole.
