Description

Product description – The Accessible Toilet Door System is designed for use with Franchi automatic door operators, providing a simple, intuitive, and touch-free user experience for both door opening and door locking functions. Specifically developed to support accessible and inclusive washroom facilities, the system enables users to operate doors independently with minimal effort, improving convenience, hygiene, and dignity.

How It Works**Unlock & Exit**

Wave a hand near the internal sensor again.

The door unlocks and automatically opens.

Indicator lights stop flashing and the external sensor is re-enabled for the next user.

To enter - Wave a hand near the external sensor.

The automatic door opens to allow access.

To lock - Wave a hand near the internal sensor. The door locks automatically.

Flashing indicators confirm the toilet is occupied and disable the external entry sensor.
